Subject: Environmental protection

Dear Mr. Pruitt,

I am writing to urge you to forsake actions that will allow the environment to be degraded in the name of profit for private industry. Too often in this country, profits are privatized but losses socialized. When this happens, it is we, the people, who pay with our health and with our tax dollars to clean up the mess that coal, oil, gas, mining and other industries leave behind. These so called profits may be great for the few but they are terrible for the American people. Thank you for remembering that it is we for whom you now work.

Sincerely,
Leah Haimo
